Contents

Volume 128 (1984)

umuC-dependent and *umuC*-independent γ- and UV-radiation mutagenesis in *Escherichia coli* (MTR 03892)
by Neil J. Sargentini and Kendric C. Smith (Stanford) 1– 9
Mutagenicity to Salmonella of the *mono*methylamino and *N*-cyanoethyl analogues of 4-dimethylaminoazobenzene (DAB) and 6-dimethylaminophenylazobenzthiazole (6BT) (MTR 03896)
by John Ashby, R.D. Callander, P.A. Lefevre, D. Paton and B. Fishwick (Alderley Park and Manchester) 11– 16
Stage-specific induction of sister-chromatid exchanges in utero (MTR 03888)
by Narendra P. Singh, Angelo Turturro and Ronald W. Hart (Jefferson) 17– 24
Effect of caffeine on induced damage in cells of *Xenopus laevis* (MTR 03889)
by C. Tanzarella, S. Astolfi and F. Palitti (Roma) 25– 29
Relationship between cell killing, chromosomal aberrations, sister-chromatid exchanges and point mutations induced by monofunctional alkylating agents in Chinese hamster cells
A correlation with different ethylation products in DNA (MTR 03890)
by A.T. Natarajan, J.W.I.M. Simons, E.W. Vogel and A.A. van Zeeland (Leiden) 31– 40
Evolution of an octacentric isochromosome in mouse L-cells (MTR 03893)
by Baldev K. Vig, Raymond P. Zinkowski and Don S. Michaelson (Reno) 41– 45
Mutation of xeroderma pigmentosum lymphoblasts by far-ultraviolet light (MTR 03885)
by J.G. DeLuca, D.A. Kaden, E.A. Komives and W.G. Thilly (Cambridge) 47– 57
Liquid-holding experiments with human peripheral lymphocytes
II. Experiments with trenimon and 1-β-D-arabinosylcytosine (MTR 03887)
by S. Kalweit and G. Obe (Berlin) 59– 64
Analysis of spontaneous early embryonic lethality in mice (MTR 03891)
by Martha M. Larsen and Walderico M. Generoso (Oak Ridge) 65– 72
The load of genetic and partially genetic disorders in man
I. Congenital anomalies: estimates of detriment in terms of years of life lost and years of impaired life (MTR 03903)
by A. Czeizel and K. Sankaranarayanan (Budapest and Leiden) 73–103
The influence of simple aromatics on benzene clastogenicity (MTR 03907)
by Barbara L. Harper, V.M. Sadagopa Ramanujam, Mohy M. Gad-El-Karim and Marvin S. Legator (Galveston) .. 105–114
A procedure for the statistical evaluation of Ames Salmonella assay results
Comparison of results among 4 laboratories (MTR 08544)
by Ronald D. Snee and Joseph D. Irr (Wilmington) 115–125
Mutagenicity of neocarzinostatin in *Neurospora crassa* (MTR 03897)
by William G. DeGraff (Normal) 127–135
UV-induced recessive lethals in *uvs* strains of Neurospora which are deficient in UV mutagenesis (MTR 03906)
by Etta Käfer (Montreal) 137–146
Lethal mutations induced in *Drosophila melanogaster* by direct or indirect action of pteridines (MTR 03900)
by C. l'Hélias, J. Proust, I. Ebels and C.A. Salemink (Gif-sur-Yvette, Orsay and Utrecht) 147–152
Effect of L-ethionine on spontaneous and MMC-induced SCEs in G_0 and G_1 human lymphocytes under liquid-holding recovery conditions (MTR 03898)
by Paolo Perticone, Rosella De Salvia, Caterina Tanzarella and Fabrizio Palitti (Rome) 153–159
Statistical analysis of the micronucleus test (MTR 03901)
by Gillian E. Amphlett and Graham F. Delow (Ware) 161–166
SCE frequencies in lymphocytes of systemic lupus erythematosus patients (MTR 03902)
by H. Tuschl, R. Kovac, A. Wolf and J.S. Smolen (Seibersdorf and Vienna) 167–171
Induction of micronuclei in mouse fetal liver after exposure in utero to *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine (MTR 08541)
by Koichi I. Yamamoto and Yasumoto Kikuchi (Osaka) 173–179

0027-5107/84/$03.00 © 1984 Elsevier Science Publishers B.V.

Morphological and cytogenetic studies of dominant lethality induced by mitomycin C and cyclophosphamide in female germ cells
The use of Robertsonian translocations as a 'marker system' to identify the zygote pronuclei (MTR 03894)
by P. Jacquet and P. Pire (Mol) 181–194
A comparison of alternative distributions of postimplantation death in the dominant lethal assay (MTR 03908)
by David M. Smith and Derek A. James (Beckenham) 195–206
Enhanced radiosensitivity for the induction of translocations in mouse stem cell spermatogonia following treatment with cyclophosphamide or adriamycin (MTR 03913)
by Paul P.W. van Buul (Leiden) 207–211
Poly(ADP-ribose) metabolism appears normal in EM9, a mutagen-sensitive mutant of CHO cells (MTR 03895)
by Miyoko Ikejima, Dian Bohannon, D. Michael Gill and Larry H. Thompson (Boston and Livermore) 213–220
Assay for gene mutation in a human lymphoblast line, AHH-1, competent for xenobiotic metabolism (MTR 03899)
by Charles L. Crespi and William G. Thilly (Cambridge) 221–230
